

HAYWIRED FIRST WORLDS CHAMPIONSHIP DONATION REQUEST

Dear Magic Valley Businesses,

We are Haywired Robotics, a FIRST (For Inspiration and Recognition of Science and Technology) Tech Challenge robotics team, based out of Filer, Idaho. We are a community based, nonprofit team of five high school students. We call ourselves Haywired Robotics as we are all farm kids involved in 4-H/FFA and wanted a name that relates to ourselves as nerdy, farm kids. Our team's mission is to unite our love of agriculture and our love of STEM in our local community.

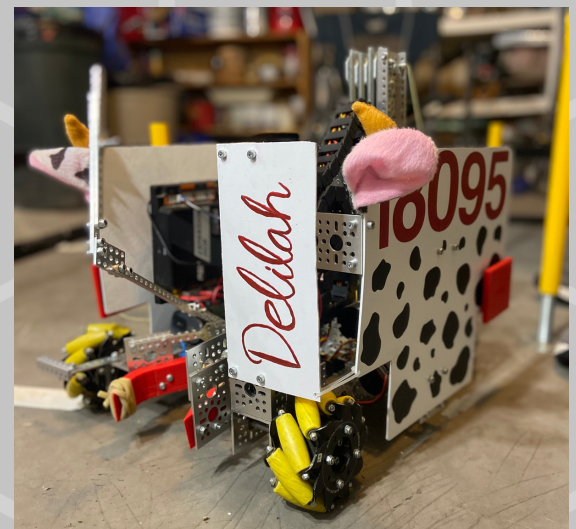

In FIRST Tech Challenge, teams spend a significant amount of time designing, building, programming their robot, and learning what it takes to be part of a team. For many teams, competitions are the reward for all their hard work throughout the season. However, *FIRST* Tech Challenge is more than a robot competition; in addition to robot matches, teams are also eligible to win judged awards.

Choosing award winners is a difficult task and judges take the responsibility very seriously. The judged awards represent a positive way to recognize teams who embody important values like Gracious Professionalism™, teamwork, creativity, innovation, and the value of the engineering design process.

Bot

Each year we compete, Haywired Robotics strives to win the Inspire Award which is the highest award we can receive as it signifies that we are the best we can be in all areas of the program. And THIS year, we finally did it! And as a result, we are going to compete at FIRST Worlds Championship in Houston, Texas this April!!

Let us show you what we did to win it.

This is us with our FLL team Vurtical! We mentored them through their season.

This is us at Cache Cow Dairy. They are operated by lots of robotics machinery, so we thought why not go see cows and robots at the same time.

This is us competing at the Provo Utah Qualifier.

Ways to give:
"Haywired Robotics" at any First Fed, Check or Venmo

Any gift will be appreciated and your logo will be displayed in our pit
